MISSION: LIFELINE® EMS RECOGNITION PROGRAM

EMS LEADS THE WAY TO TIMELY TREATMENT. WE LEAD THE APPLAUSE.

EMS professionals play a vital role in saving lives from heart attacks. We think it’s time to publicly acknowledge their heroic efforts.

That’s the idea behind Mission: Lifeline EMS Recognition. It’s a new program that recognizes EMS teams for their efforts in STEMI care as part of Mission: Lifeline, the American Heart Association program for improving STEMI and cardiac resuscitation systems of care.

Learn how your EMS team can earn this leading-edge recognition. Visit www.Heart.org/EMSRecognition

The online application period begins January 1, 2016 and remains open through March 31, 2016. The application will collect information and data for STEMI patients treated and transported by EMS during the 2015 calendar year.
