

Prehospital Point-of-Care Ultrasound

♦ Butterfly® probes provided on site

♦ Small-group scanning stations

♦ No prior ultrasound experience needed

► Scan. Interpret. Decide. — Putting ultrasound in the hands of every paramedic.

YOU'LL LEARN...

01 eFAST & Trauma

Free fluid and pericardial views: right upper quadrant (Morison's pouch), left upper quadrant, pelvic and subxiphoid windows.

02 Cardiac Arrest

Subxiphoid and parasternal windows to look for cardiac activity and support resuscitation decisions on scene.

TRAINING EQUIPMENT

Hands-on scanning on Butterfly® handheld probes — one probe for whole-body imaging, connected straight to a phone or tablet.

WHO SHOULD ATTEND?

Paramedics, critical care and flight crews, EMTs working toward POCUS credentialing, and EMS educators building an in-house ultrasound program. Open to all EMS personnel, ACP's, and physicians.

HOW TO REGISTER

1

Go to ClearlyTMS

Scan the QR code to register.

2

Sign in or create an account

Follow the registration form for this course to set it up. If you're a member of an affiliated agency, your EMT number is your coupon code.

3

Enter your credentials

Make sure you update your "State EMT Number" in the "Credentials" tab once your account is confirmed.

4

Complete the coursework

Complete all of the pre-course work before the skills session.
