

Stony Brook Children's Pediatric Trauma Center

Safe Transport of the Pediatric Patient

EMS providers transport fewer pediatric patients, which may result in less familiarity with optimal transport techniques. The session focuses on proper transport techniques for children, including the use of car seats and stretcher-integrated harnesses. Learn the complexities of securing pediatric patients and improve skills through hands-on practice to confidently ensure pediatric safety during transport.

Monday, June 29, 2026

6:00pm - 7:30pm

Holbrook Fire Department

390 Terry Road, Holbrook, NY 11741
