

Stony Brook Children's Pediatric Trauma Center

Prehospital Management of Pediatric Hemorrhagic Shock

Join us for an in-depth review of current evidence-based strategies for the prehospital assessment and management of pediatric hemorrhagic shock, with a focus on rapid identification, resuscitation priorities, hemorrhage control, and transport decision-making. The presentation will provide practical, field-ready approaches to improve outcomes for pediatric trauma patients.

Wednesday, June 3, 2026

7:00pm - 8:30pm

**Hampton Bays
Volunteer Ambulance**

18C Ponquogue Avenue
Hampton Bays, NY 11946
