Subject: REMAC Quality Improvement Project for 2025
To: All EMS Agencies and Fire Districts in Suffolk County

Date: September 30, 2025

On July 8, 2025, the Suffolk County REMAC approved a regional quality improvement project on the use of supra-glottic airways. The REMAC requests that each EMS Agency and Fire District review their supra-glottic airway uses from the time period of July 1, 2025, to January 1, 2026, and compile a summary report.

Specifically, the REMAC is requesting the following information:

- The total number of uses of supra-glottic airways
- The brand of supra-glottic airway that your EMS Agency or Fire District uses (list all if more than one, and if more than one which brand was used most often)
- List the number of uses of supra-glottic airways by level of provider (EMT-Basic, Advanced EMT, EMT-Critical Care, and Paramedic)
- Percentage of time waveform capnography was properly documented on the ePCR with the use of a supra-glottic airway

Please complete and submit the report to the REMAC via the email QAQI@suffolkcountyny.gov by January 15, 2026. Please ensure that the EMS Agency or Fire District name is clearly documented on the report and list a contact person and email for QAQI communication purposes.

The REMAC will review the data and submit a full report to the REMAC at the end of January and a copy will be sent to each EMS Agency and Fire District as well to serve as a benchmark for comparing each EMS Agency and Fire District with the County-wide data.

Thank you,

R. Trevor Marshall, MD – REMAC Chair
Jason Winslow, MD – REMAC QI Committee Chair
